PROFESSIONAL SUMMARY

Forward-thinking Solutions Architect with advanced specializing in **Agentic AI, Multi-Agent Systems, and cloud-native architectures**. Proven expertise in designing scalable AI-driven systems using **OpenAI Agents SDK, AWS Bedrock, LangGraph, CrewAI, MCP, and RAG frameworks**.

Key Achievement: Led the design of a **fully automated AI-based incident lifecycle in ServiceNow**, from incident creation through root cause analysis to automated ticket updates. Implemented agent-driven log analysis and RCA, eliminating dependency on manual investigation and L1/L2 support effort. Delivered faster resolution times, **reduced operational costs, and consistent RCA quality across enterprise environments**.

Experienced in building production-grade APIs with **FastAPI/Uvicorn**, containerized solutions using **Docker** and **Podman**, interactive AI dashboards with **Streamlit** and **Chainlit**, and Kubernetes deployments via **Helm** with **Rolling Update, Blue-Green, and Canary strategies**. Developed scalable AI systems with Function Tools (Python-to-LLM integration) and comprehensive **CloudWatch** monitoring/alerting for mission-critical infrastructure.

Key Achievement: Reduced cloud infrastructure costs by 35% through Terraform and AWS ECS/Fargate deployments.

Proficient in **Python 3.12, UV package manager, GitHub Actions, Jenkins, Git**, and modern AI engineering best practices. Strong knowledge of core machine learning concepts, **Responsible AI principles** (bias mitigation, model fairness, transparency, governance), and AI ethics/safety.

CERTIFICATIONS

AWS Certified AI Practitioner

- Amazon Bedrock – Generative AI
- Prompt Engineering with Claude AI
- A2A Protocol
- AWS Solutions Architect – Associate
- AWS Cloud Practitioner
- Certified Kubernetes Administrator (CKA)
- Certified Kubernetes Application Developer (CKAD)
- AWS Migration Certification

- DevOps Engineer Certification
 - SAFe Practitioner (SP)
 - Certified Scrum Master
-

CORE SKILLS

Agentic AI & Multi-Agent Systems

- OpenAI Agents SDK, LangGraph, CrewAI, AWS Bedrock Agents
- Agent orchestration, handoffs, memory, guardrails
- A2A Protocol, multi-agent collaboration

LLM & Generative AI

- GPT-5.x, Codex, Claude, Gemini, Qwen
- Prompt Engineering, LangChain
- Function calling, tool integration

RAG & MCP

- Retrieval-Augmented Generation (RAG)
- Vector databases, hybrid search, metadata filtering
- Model Context Protocol (MCP), context injection

Cloud & DevOps

- AWS (ECS, EKS, Fargate, Lambda)
- Terraform, Ansible (IaC)
- Kubernetes, Helm (Rolling, Blue-Green, Canary)
- CI/CD: GitHub Actions, Jenkins, AWS Pipeline

Backend & API Development

- FastAPI, Uvicorn, REST APIs
- Async Python

Observability & Security

- AWS CloudWatch, OpenTelemetry, ADOT
 - Prometheus, Grafana
 - IAM, WAF, runtime security
-

PROFESSIONAL EXPERIENCE

HCL Technologies Ltd. – Noida, India | McLean, USA

Solutions Architect | *Jan 2022 – Present*

AI-Driven Incident Management & ITSM Automation

- Led the design of a **fully automated AI-based incident lifecycle**, from incident creation to root cause analysis and ticket updates in ServiceNow
- Implemented **agent-driven log analysis and RCA**, removing dependency on manual investigation and L1/L2 effort
- **Delivered faster resolution, lower operational costs**, and consistent RCA quality across enterprise environments

LLM Optimization, Cloud DevOps

- Optimized LLMs (GitHub Copilot, **Codex-5.3, GPT-5.4**) for code generation, improving **developer productivity by 50-60%**
- Automated AWS ECS and Fargate clusters using Terraform reducing cloud **infrastructure costs by 35%**
- Engineered end-to-end CI/CD pipelines using GitHub Actions, automating build, test, and deployment workflows across AWS EKS/Fargate, **reducing release cycle time by 45%**
- Orchestrated zero-downtime Kubernetes deployments using Helm charts with Rolling Update, Blue-Green, and Canary strategies, **improving release reliability by 40%**
- Deployed AWS ADOT and OpenTelemetry pipelines integrated with CloudWatch dashboards, **cutting MTTR by 40%**
- Built production-grade FastAPI/Uvicorn microservices with async Python for high-performance API endpoints

Coforge Ltd. (formerly NIIT Technologies Ltd.) – Greater Noida, India

Senior Technical Architect | *Jul 2008 – Jan 2022*

- Architected and deployed **Kubernetes-native microservices ecosystems**, optimizing resource utilization, improving horizontal scalability, and strengthening system resilience for high-availability enterprise workloads
- Spearheaded enterprise **cloud migration to AWS**, leveraging Amazon EKS, Lambda, and Terraform for infrastructure-as-code automation, reducing cloud operational costs by 35% while modernizing legacy applications
- Engineered **automated CI/CD pipelines using Jenkins workflows**, accelerating release cycles by 60% (reducing deployment windows from multiple days to under 4 hours) while eliminating manual configuration errors

Birlasoft Ltd. – Noida, India

System Analyst (SOA) | *Jan 2007 – Jul 2008*

- Architected enterprise-grade **service-oriented architectures (SOA)** using industry standards (SOAP/REST, WSDL), enabling seamless integration across heterogeneous systems and improving cross-platform interoperability by 40%
 - Mentored and upskilled 8+ junior developers on **software architecture best practices**, design patterns, and SOA principles, accelerating team onboarding time by 30% and improving code quality metrics by 25%
-

Tata Consultancy Services – Lucknow, India

ITA (Java/J2EE) | *May 2006 – Jan 2007*

- Developed and maintained enterprise-grade Java **applications using J2EE standards**, enabling seamless integration with legacy systems and improving data processing efficiency for Fortune 500 clients
 - Collaborated with cross-functional Agile teams (Product, QA, DevOps) to deliver mission-critical applications, reducing **time-to-market by 25%** and achieving **99.8% post-release stability through rigorous code reviews and automated testing**
-

HCL Technologies Ltd. – Noida, India

Senior Software Engineer (Java) | *Oct 2004 – Apr 2006*

- Designed and implemented scalable **Java/J2EE enterprise applications** leveraging Spring Framework, Hibernate, **and RESTful APIs**
 - Partnered with cross-functional stakeholders across the SDLC to deliver high-quality, maintainable applications, fostering a culture of **continuous improvement and technical excellence**
-

CMC Ltd. – New Delhi, India

Software Engineer (Java) | *Dec 2000 – Sep 2004*

Developed and maintained mission-critical Java applications for government and enterprise clients, leveraging J2EE standards and object-oriented design patterns to ensure regulatory compliance, system reliability, and seamless integration with legacy infrastructure

EDUCATION

Master of Computer Application (M.C.A.)

Maulana Azad National Institute of Technology (NIT), Bhopal, India

Jul 1997 – Jun 2000 | 69.9%
