Greater Noida, India | H1B Visa Holder - Authorized to Work in the U.S. | vohraaneeraj@gmail.com | +91-9871037773 | [linkedin.com/in/neeraj-vohraa-7a83601a1](https://www.linkedin.com/in/neeraj-vohraa-7a83601a1)

PROFESSIONAL SUMMARY

- **Solutions Architect with 20+ years of experience** across **enterprise architecture, cloud-native platforms, distributed systems, microservices, Kubernetes, Java/J2EE, and modern application architecture**, with the last 2+ years focused on **Enterprise AI, Generative AI, and Agentic AI**.
- Hands-on architect specializing in **AI Platform Architecture, Agentic AI, Multi-Agent Systems, RAG, LLM applications, AI Governance, Responsible AI, AI Observability, and LLMOps**, delivering secure, scalable, production-ready enterprise AI solutions across **AWS and Google Cloud**.
- Architected enterprise AI platforms using **Google ADK, Vertex AI, OpenAI Agents SDK, LangGraph, LangChain, Model Context Protocol (MCP), Agent-to-Agent (A2A), Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Agent Memory, and FastAPI**.
- Strong expertise in **AI Governance, Policy-Driven AI, Prompt Management, Context Management, Knowledge Grounding, AI Guardrails, AI Evaluation, AI Output Validation, Model Armor, Google Cloud DLP, Explainable AI, AI Cost Optimization, and Zero Trust AI**.
- Hands-on across the architecture lifecycle: **solution design, technical strategy, prototyping, Python development, code reviews, cloud-native deployment, DevSecOps, Infrastructure as Code, observability, and production implementation**.

KEY ACHIEVEMENTS

- **Reduced MTTR by 40%** through **AI-powered Incident Management, autonomous Root Cause Analysis, AI Observability, and workflow automation**.
- **Reduced cloud and AI operational costs by 35%** through **context management, prompt optimization, intelligent model routing, Terraform automation, and AWS ECS optimization**.
- **Improved developer productivity by 50-60%** through **reusable AI Platform Services, FastAPI accelerators, prompt management, and AI-assisted development workflows**.
- **Improved release velocity by 45%** through **DevSecOps, Infrastructure as Code, CI/CD, OpenTelemetry, CloudWatch, Prometheus, and Grafana**.

CORE SKILLS

Enterprise AI & Agentic AI: Enterprise AI, Generative AI (GenAI), Agentic AI, Multi-Agent Systems, AI Platform Engineering, LLM Applications, AI Orchestration, Agent Memory, Human-in-the-Loop (HITL)

GenAI Frameworks & Protocols: Google ADK, Vertex AI, OpenAI Agents SDK, LangGraph, LangChain, MCP, A2A, RAG, FastAPI, Prompt Engineering

Responsible AI & Governance: Responsible AI, AI Governance, AI Guardrails, AI Evaluation, AI Observability, LLMOps, Explainable AI, Policy-Driven AI, Model Armor, Google Cloud DLP, Zero Trust AI

AI Platform Lifecycle: AI Input Pipelines, Knowledge Grounding, Prompt Management, Context Management, AI Output Validation, Evaluation Frameworks, Intelligent Model Routing, AI Cost Optimization

Cloud & Platform: AWS, GCP, Google Vertex AI, Kubernetes, GKE, EKS, ECS, AWS Lambda, Docker, Helm, Istio, Terraform, Infrastructure as Code (IaC)

Software & Architecture: Solution Architecture, Enterprise Architecture, Cloud Architecture, Platform Engineering, Microservices, Event-Driven Architecture, Hexagonal Architecture, Clean Architecture, SOA

Programming & APIs: Python, FastAPI, Java, Spring Boot, Spring, Hibernate, REST APIs, SOAP, XML, Microservices

DevSecOps & Observability: DevSecOps, GitOps, GitHub Actions, GitLab CI/CD, Jenkins, Ansible, OpenTelemetry, CloudWatch, Prometheus, Grafana

Enterprise Tools: ServiceNow, Jira, Confluence, Agile, Scrum, SAFe

NEERAJ VOHRA

PROFESSIONAL EXPERIENCE

SOLUTIONS ARCHITECT

HCL Technologies Ltd. | Noida, India | McLean, USA | Jan 2022 - Present

- Architected an **Enterprise AI Platform on Google Vertex AI** using **Policy-Driven Hexagonal Architecture**, establishing reusable platform capabilities for secure, scalable, and governed enterprise AI adoption.
- Designed reusable **AI Platform Services** covering **AI Governance, Policy Engine, Prompt Management, Context Management, Model Armor, Google Cloud DLP, AI Guardrails, AI Evaluation, and AI Cost Optimization**.
- Architected and delivered **Agentic AI and Multi-Agent solutions** using **Google ADK, OpenAI Agents SDK, LangGraph, MCP, A2A, RAG, FastAPI, and Agent Memory** for **Incident Management, Root Cause Analysis, ServiceNow automation, and enterprise workflow orchestration**.
- Designed **cloud-native AI deployment architecture** across **Google Vertex AI, Kubernetes, GKE, AWS ECS, Docker, Helm, Istio, GitLab CI/CD, and OpenTelemetry**, improving scalability, resilience, deployment consistency, and operational visibility.
- Established **DevSecOps, Infrastructure as Code, and AI Observability** using **Terraform, GitLab CI/CD, OpenTelemetry, CloudWatch, Prometheus, and Grafana**, contributing to a **45% improvement in release velocity**.
- **Reduced MTTR by 40%** through **AI-powered Incident Management, autonomous Root Cause Analysis, AI Observability, and intelligent workflow automation**.
- **Reduced cloud infrastructure and AI operational costs by 35%** through **Terraform automation, AWS ECS optimization, intelligent model routing, context management, and prompt optimization**.
- **Improved developer productivity by 50-60%** through reusable **AI Platform Services, FastAPI accelerators, prompt management, and LLM optimization**.

SENIOR TECHNICAL ARCHITECT

Coforge Ltd. (formerly NIIT Technologies Ltd.) | Greater Noida, India | Jul 2008 - Jan 2022

- Architected **enterprise cloud-native solutions** using **Microservices, REST APIs, Kubernetes, and Event-Driven Architecture**, improving scalability, resilience, availability, and maintainability.
- Led **cloud transformation and application modernization** on **AWS** using **Amazon EKS, Amazon ECS, AWS Lambda, Terraform, and Infrastructure as Code (IaC)**, contributing to a **35% reduction in infrastructure costs**.
- Designed and implemented **Kubernetes platform architecture** using **Helm, GitOps, Auto Scaling, High Availability, Rolling, Blue-Green, and Canary deployment strategies**, improving reliability and deployment consistency.
- Established enterprise **DevSecOps** practices using **Jenkins, GitLab CI/CD, Docker, Terraform, and Ansible**, reducing deployment time from days to **under four hours**.
- Provided technical leadership across **solution architecture, cloud modernization, application engineering, deployment automation, platform engineering, and enterprise transformation**.

NEERAJ VOHRA

EARLIER CAREER | EDUCATION | CERTIFICATIONS

SYSTEM ANALYST (SOA)

Birlasoft Ltd. | Noida, India | Jan 2007 - Jul 2008

- Led the design and implementation of **Service-Oriented Architecture (SOA)** solutions using **SOAP, REST, WSDL, XML, and Web Services**, enabling scalable and reusable enterprise integration.
- Designed enterprise integration services and reusable APIs by defining **service contracts, integration patterns, and interface standards**, improving interoperability, maintainability, and scalability.
- Collaborated with business analysts, architects, and development teams to deliver **enterprise integration solutions** aligned with business requirements, solution architecture, and SOA best practices.

IT ANALYST - JAVA/J2EE

Tata Consultancy Services (TCS) | Lucknow, India | May 2006 - Jan 2007

- Developed enterprise applications using **Java/J2EE, REST APIs, and Object-Oriented Design**, integrating legacy systems with modern enterprise applications.
- Collaborated with cross-functional **Agile teams** to develop scalable, high-availability solutions while improving application performance, software quality, and release efficiency.

SENIOR SOFTWARE ENGINEER - JAVA

HCL Technologies Ltd. | Noida, India | Oct 2004 - Apr 2006

- Designed and developed enterprise applications using **Java, Spring, Hibernate, and REST APIs**, delivering scalable, maintainable, and high-performance business solutions.
- Contributed across the **Software Development Life Cycle (SDLC)** while collaborating with product owners, QA, and engineering teams to improve application performance, code quality, and maintainability.

SOFTWARE ENGINEER - JAVA

CMC Ltd. | New Delhi, India | Dec 2000 - Sep 2004

- Developed and maintained enterprise applications using **Java/J2EE, Object-Oriented Programming, and reusable software components** for enterprise and government customers.
- Contributed to **application development, production support, performance optimization, and application stability**, collaborating with senior engineers to improve software quality and maintainability.

EDUCATION

Master of Computer Application (M.C.A.) | Maulana Azad National Institute of Technology (NIT), Bhopal, India | Jul 1997 - Jun 2000

CERTIFICATIONS

Enterprise AI & Generative AI: AWS Certified AI Practitioner | AWS Generative AI with Amazon Bedrock | Prompt Engineering with Claude AI | Agent-to-Agent (A2A) Protocol

Cloud & Solution Architecture: AWS Certified Solutions Architect - Associate | AWS Certified Cloud Practitioner | AWS Migration

Kubernetes & DevOps: Certified Kubernetes Administrator (CKA) | Certified Kubernetes Application Developer (CKAD) | DevOps Engineer

Agile & Delivery: SAFe Practitioner (SP) | Certified Scrum Master (CSM)
