PROFESSIONAL SUMMARY

AI Solutions Architect with 20+ years of experience architecting AI platforms, cloud-native solutions, distributed systems, and enterprise-scale application architectures across AWS and Google Cloud.

Specialized in **AI Platform Engineering, Responsible AI, Solution Architecture, Agentic AI, Multi-Agent Systems, Vertex AI, OpenAI Agents SDK, LangGraph, AWS Bedrock, MCP, and Retrieval-Augmented Generation (RAG).**

Designed reusable **AI Platform Services** including **AI Governance, Policy Engine, Prompt Management, Context Caching, Model Armor, Google Cloud DLP, AI Guardrails, AI Evaluation, and AI Cost Optimization** using **Policy-driven Hexagonal Architecture**.

Experienced in **Solution Architecture, Kubernetes, DevSecOps, Infrastructure as Code (IaC), Cloud Modernization, Platform Engineering, and AI Platform Delivery** with a strong focus on scalability, security, governance, and operational excellence.

KEY ACHIEVEMENTS

- **Architected AI Platform on Google Vertex AI** using **Policy-driven Hexagonal Architecture**, enabling secure and scalable AI adoption.
- **Designed AI Platform Services** integrating **AI Governance, Policy Engine, Prompt Management, Context Caching, Model Armor, Google Cloud DLP, AI Guardrails, and AI Evaluation**.
- **Delivered Multi-Agent AI Solutions** using **OpenAI Agents SDK, LangGraph, MCP, RAG, and FastAPI**.
- **Reduced MTTR by 40%** through AI-driven Incident Management, autonomous Root Cause Analysis, and AI observability.
- **Reduced cloud and AI operational costs by 35%** using Context Caching, Prompt Optimization, Terraform automation, and AWS ECS optimization.

CORE SKILLS

AI Platform Engineering: Vertex AI, Gemini, OpenAI Agents SDK, LangGraph, AWS Bedrock, MCP, RAG, Agentic AI, Multi-Agent Systems

Responsible AI: AI Governance, Policy Engine, Prompt Management, Context Caching, Model Armor, Google Cloud DLP, AI Guardrails, AI Evaluation, AI Security, LLMOps

Cloud & Solution Architecture: AWS, GCP, Kubernetes, GKE, ECS, Terraform, Infrastructure as Code (IaC), Hexagonal Architecture, Microservices, Event-Driven Architecture

DevSecOps & Observability: Helm, Istio, GitLab CI/CD, Docker, OpenTelemetry, CloudWatch, Prometheus, Grafana

Programming & API Development: Python, FastAPI, Java, Spring Boot, REST APIs, ServiceNow Integration

PROFESSIONAL EXPERIENCE

HCL Technologies Ltd. – Noida, India | McLean, USA

Solutions Architect | Jan 2022 – Present

- Architected an enterprise AI platform on **Google Vertex AI using Policy-driven Hexagonal Architecture**, delivering reusable platform services for secure, scalable, and governed AI application development.
- Designed Reusable AI Platform Services including **AI Governance, Policy Engine, Prompt Management, Context Caching, Model Armor, Google Cloud DLP, AI Guardrails, AI Evaluation**, and **AI Cost Optimization**.
- **Provided Technical Leadership** by partnering with business stakeholders, product owners, and engineering teams to define AI platform strategy, solution architecture, technology standards, and AI adoption.
- **Architected Multi-Agent AI Solutions** using **OpenAI Agents SDK, LangGraph, MCP, RAG, FastAPI**, and **Agent Memory** for Incident Management, Root Cause Analysis, and ServiceNow automation.
- **Designed AI Deployment Architecture** across **Google Vertex AI, Kubernetes, GKE, AWS ECS, Helm, GitLab CI/CD, Istio**, and **OpenTelemetry**.
- **Established DevSecOps and AI Observability** using **Terraform, GitLab CI/CD, OpenTelemetry, CloudWatch, Prometheus**, and **Grafana**, improving release velocity by **45%**.
- **Reduced MTTR by 40%** through AI-driven Incident Management, autonomous Root Cause Analysis, AI observability, and workflow automation.

- **Reduced cloud and AI operational costs by 35%** using **Context Caching, Prompt Optimization, Intelligent Model Routing, AWS ECS optimization, and Terraform automation.**
 - **Improved developer productivity by 50–60%** through **AI Platform Services, Prompt Management, FastAPI accelerators, and LLM optimization.**
-

Coforge Ltd. (formerly NIIT Technologies Ltd.) – Greater Noida, India

Senior Technical Architect | Jul 2008 – Jan 2022

- **Architected cloud platform solutions** using **Microservices, Kubernetes, REST APIs, and Event-Driven Architecture**, improving scalability, resiliency, and platform availability.
 - **Led Cloud Transformation** and application modernization on **AWS (EKS, ECS, Lambda)** using **Terraform and Infrastructure as Code (IaC)**, reducing infrastructure costs by **35%**.
 - **Designed Kubernetes Platform Architecture** implementing **Helm, GitOps, Auto Scaling, High Availability, Blue-Green, and Canary Deployment** strategies.
 - **Established DevSecOps Practices** using **Jenkins, GitLab CI/CD, Docker, Terraform, and Ansible**, reducing deployment time from days to **under four hours.**
-

Birlasoft Ltd. – Noida, India

System Analyst (SOA) | Jan 2007 – Jul 2008

- **Designed Service-Oriented Architecture (SOA)** solutions using **SOAP, REST, WSDL, XML, and Web Services**, enabling enterprise application integration.
 - **Designed Integration Services and Enterprise APIs** using reusable service contracts, improving interoperability, maintainability, and application integration.
 - **Collaborated on Solution Architecture** with business analysts and development teams to deliver scalable integration solutions aligned with enterprise architecture standards.
-

Tata Consultancy Services (TCS) – Lucknow, India

IT Analyst (Java/J2EE) | May 2006 – Jan 2007

- **Designed Enterprise Applications** using **Java/J2EE, REST APIs, and object-oriented design principles**, integrating legacy platforms.

- **Collaborated with Agile Teams** to deliver scalable, high-availability applications while improving software quality, performance, and release efficiency.
-

HCL Technologies Ltd. – Noida, India

Senior Software Engineer (Java) | Oct 2004 – Apr 2006

- **Designed Java Enterprise Applications** using **Spring**, **Hibernate**, and **REST APIs**, improving application performance and maintainability.
 - **Contributed to Solution Delivery** across the **Software Development Life Cycle (SDLC)**, collaborating with product, QA, and engineering teams to deliver high-quality business solutions.
-

CMC Ltd. – New Delhi, India

Software Engineer (Java) | Dec 2000 – Sep 2004

- **Developed Enterprise Applications** using **Java/J2EE**, object-oriented design, and reusable software components for enterprise and government customers.
 - **Improved Application Performance** through software engineering best practices, performance optimization, production support, and application maintainability.
-

EDUCATION

Master of Computer Application (M.C.A.)

Maulana Azad National Institute of Technology (NIT), Bhopal, India

Jul 1997 – Jun 2000 | 69.9%

CERTIFICATIONS

AWS: AI Practitioner • Solutions Architect – Associate • Cloud Practitioner • Amazon Bedrock – Generative AI • AWS Migration

Kubernetes & DevOps: Certified Kubernetes Administrator (CKA) • Certified Kubernetes Application Developer (CKAD) • DevOps Engineer

Agile & AI: SAFe Practitioner (SP) • Certified Scrum Master • Prompt Engineering with Claude AI • A2A Protocol
